Group-4

1. Project Purpose and Justification

- to develop an e-commerce website that provides customers with a seamless, secure
- fully online experience
- this platform aims to make buying used phones easier and safer by offering verified listings

2. Project Objectives

- Launch a responsive website for selling second-hand phones within 2 months.
- Enable online browsing, product search, and filtering.
- Integrate secure, digital payment gateways (online payment).
- Allow customers to register, login, and manage orders.
- Provide an admin dashboard for managing products and orders.

3. Budget Information

Total Estimate Budget

100,000,000MMK

Group-4

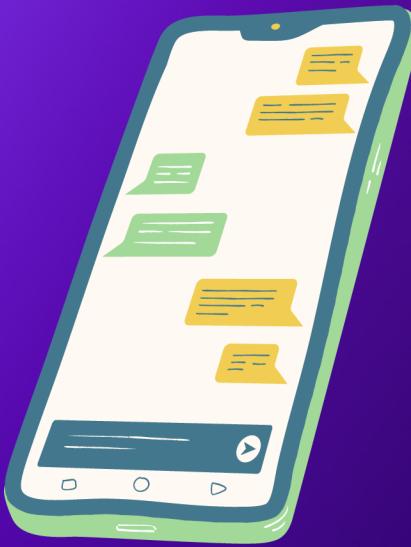

4. Assumptions

- All phones listed are verified by the admin
- All users will complete payments online before shipping
- Users have internet access and basic digital literacy

5. Approach

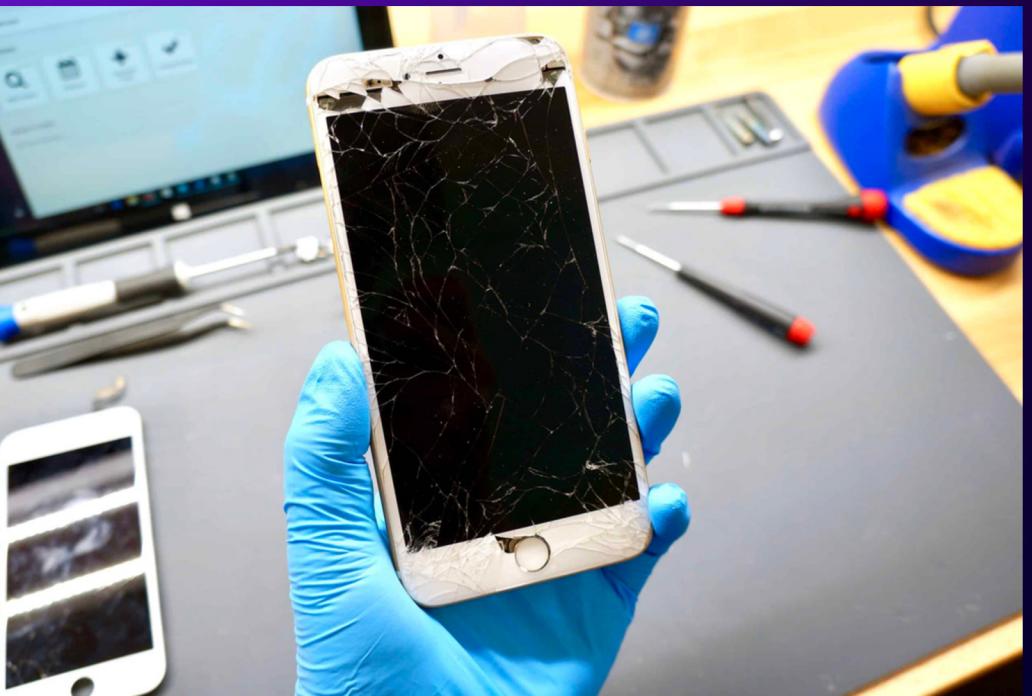

- will follow a phased agile approach,
- starting with requirement gathering and UI/UX design,
- followed by development, online payment integration, testing, and deployment
- the focus will be on building a secure, mobile-friendly platform that allows users to browse, select, and purchase second-hand phones using online payments only

Group-4

SWOT Analysis

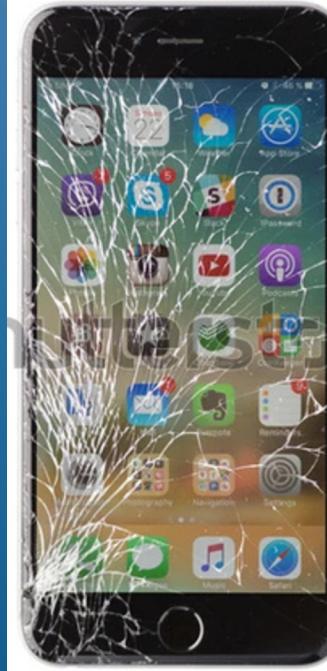

Strengths

- Low-cost phones attract price-sensitive buyers
- Simple, focused sales model
- Lower overhead (no physical store or repair service)
- Online payments streamline transactions

Weaknesses

- Limited revenue streams (sales only)
- Trust issues with used phone quality
- No repair/trade-in options to retain customers
- Higher return/refund risk

Opportunities

- Growing demand for affordable smartphones
- Eco-conscious consumer trends
- Expansion into accessories or premium listings
- Strategic partnerships with refurbishers

Threats

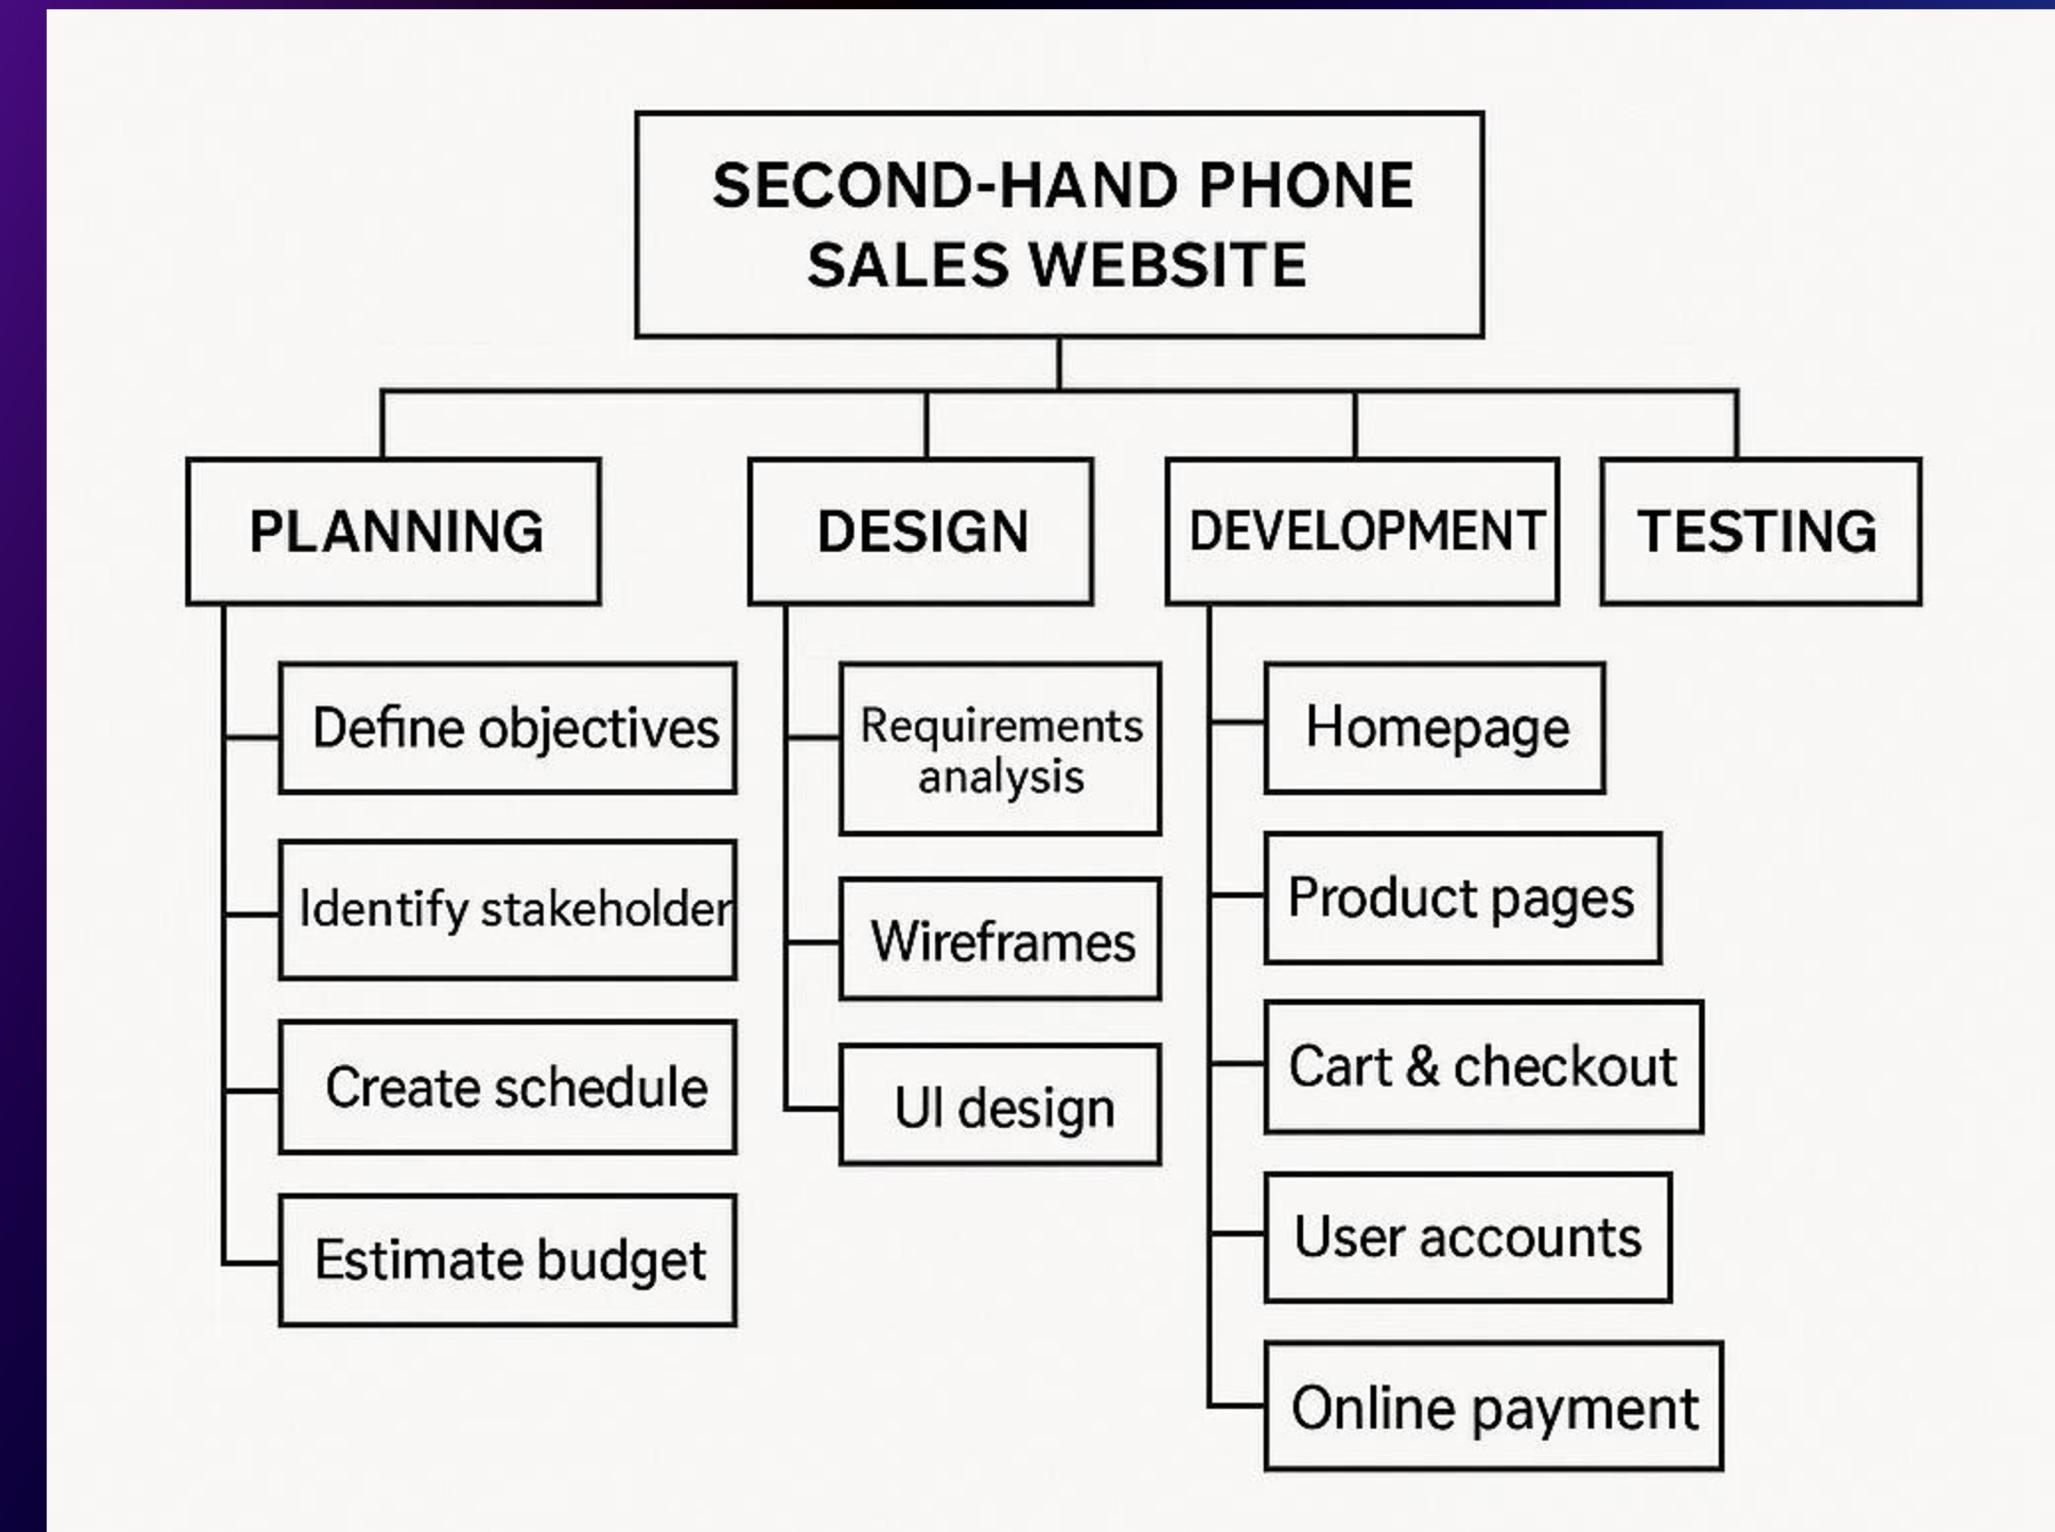

- Competition from marketplaces (online payment)
- Fraud and counterfeit risks
- Rapid device depreciation
- Legal issues around second-hand electronics
